

**Tru64 UNIX Software Technical Support Service**

Hewlett Packard will provide software technical support for Tru64 UNIX operating system software for the latest, currently shipping version and the immediate prior version of the product. Each version will be supported for 12 months from its release date, OR until the release of the 2<sup>nd</sup> subsequent version, whichever is greater. “Version” is defined as a consolidated release containing new features, enhancements and/or fixes.

Current version support (Standard Support) and Prior Version Support - Sustaining Engineering (PVS-SE) for the Tru64 UNIX operating system will be provided for its versions in accordance with the Tru64 UNIX Operating System Chart below. This chart will be updated regularly to reflect new version release dates and end-of-service for previous versions.

Prior Version Support –Sustaining Engineering (PVS-SE) provides full remedial support including elevation to HP Tru64 UNIX Engineering for problem resolution. For products supported under PVS-SE, fixes will be provided on the latest patch kit only. Customers requiring support on patch kits or releases that are no longer supported should contact their HP Representative to determine if

extended sustaining engineering support is available and under what terms and conditions such extended support may be purchased.  
Alpha Server SC configurations are specified through their support statements.  
Please contact your HP Representative, Customer Response Center, or contract administrator for additional details.
